Verifying and removing the Deploy vCenter plug-in 1

Verifying and removing the Deploy vCenter plug-in

You can use the ONTAP Select Deploy web user interface to upgrade or remove the Deploy plug-in from the vCenter server. You can also verify that the plug-in is still installed.

Before you begin

- Review [Before you begin](#).
- The VMware vCenter plug-in should be installed and registered.
- The vCenter administrator account must have the following vCenter privileges:
 - Extension
 - Update extension
 - Unregister extension

Steps

1. Sign in to the Deploy utility using the administrator account.
2. Click the **Administration** tab at the top of the page and then click **Management Servers** in the pane on the left.
3. Select the target management server and click  and optionally select one of:
 - a. **Verify Plugin**
 - b. **Unregister Plugin**
4. Provide the vCenter credentials if prompted.

After you finish

If you remove the plug-in, you must perform one of the following tasks to complete its removal from the vCenter server:

- Reboot the vCenter server
- Manually remove the plug-in from the vCenter server
